TOWER PLAST
QUALITY IS NOT A CHOICE

Tower Plast

In early 2020, in Badr Industrial City, on an area of 7,000 square meters, we started the construction of the Tower Plast IML Factory, one of the newest projects of the Industrial EL-TAISSEER Group, to represent a distinct addition to the rest of the group's factories.

The factory was based on the latest German technology and equipment as well as the selection of the best imported plastic materials to produce high quality IML packaging.

Through our products, we aspire to meet the needs of various industrial sectors such as food, the painting and chemical sector, as well as the cosmetics and health care sector.

We aim to cover the needs of the local market and the tendency to export outside the Egyptian country by participating in international exhibitions.

We apply the latest quality control standards as well as food safety, safety, occupational health and environmental conservation standards by activating international quality control systems.
